

## Programmets namn

### Kursbokslut

Blanketten skickas med e-post till utbildningsadministratören senast fyra (4) veckor efter kurslut

#### Kursfakta

Kursens namn: Utvecklingsbiologi och Genetik	Kurskod BIMA82	
Hemsida: <a href="https://moodle.med.lu.se/course/view.php?id=2084">https://moodle.med.lu.se/course/view.php?id=2084</a>		
Kursansvarig: Stefan Baumgartner	Antal poäng 15 hp	
Antal studenter 32 (BIMA82)	Startdatum 2018-09-03	Slutdatum: 2018-11-02
Antal studenter som		
klarat ordinarie examinationer 25 st (angeexaminationsformer):skriftlig	svarat på kursvärderingen: 23 st	

#### Utvärdering

Beskrivning av kursens uppläggning:

<b>PBL:</b>	Cases were OK, no complaints. For non-active students: pressure will be created by introducing an oral exam if a student fails to show adequate activity during PBL. Students agree. Students also suggest TBL which will be implemented in 2020, anyway.
<b>Study goals:</b>	Intensive discussion whether or not the weekly study goals should be published earlier. In fact, this would hurt the principle of PBL. It was agreed on that for 2019 and as <b>test</b> , we will make them available on Friday.
<b>Glossary:</b>	Very little use, but it was emphasized by the teachers repeatedly that they existed.
<b>Lectures:</b>	Topics of weeks 7 and 8 will be swapped. Organ week: fewer organs! Week 2, more genetics, less fertilization.
<b>Calculation ex.</b>	Attendance suffered, hence attendance list is required (list is compulsory according to the course syllabus). Students agree.
<b>Handouts:</b>	Useful. Teacher will investigate in advance how many are needed.
<b>Demonstrations:</b>	Were very welcomed. The written reports require a noticeable feedback from the teachers.
<b>Articles:</b>	Attendance low, hence attendance list required (list is compulsory according to the course syllabus). Students agree. Teachers: avoid short articles and make sure that articles of all weeks are more equal. Teacher and chairperson: Make sure to keep the time in order to have enough time for the "sum-up" hour.
<b>"Sum-up" hour:</b>	No complaints, was deemed very valuable. Attendance is compulsory and needs to be verified by the teacher.
<b>Exams:</b>	Main exam: adequate. Calculation exam will be arranged early, i. e. around weeks 3 or 4.
<b>Work-load:</b>	Was considered heavy.
