Blanketten skickas med e-post till utbildningsadministratören senast fyra (4) veckor efter kurslut

Kursfakta

Kursens namn: Utvecklingsbiologi och Genetik	Kurskod BIMA82	
Hemsida: https://moodle.med.lu.se/course/view.php?id=2518		
Kursansvarig: Stefan Baumgartner	Antal poäng 15 hp	
Antal studenter 17 (BIMA82)	Startdatum 2019-09-02	Slutdatum: 2019-11-01
Antal studenter som klarat ordinarie examinationer 13 st (ange examinationsformer): skriftlig		svarat på kursvärderingen: 11 st

Utvärdering

Beskrivning av kursens uppläggning:

- PBL:** Cases were OK, no complaints.
- Weekly study goals:** Intensive discussion when the weekly study goals should be published. It was agreed on that for 2020 and as **test**, we will make them available at the end of week 8 only.
- Glossary:** Very little use, but it was emphasized by the teachers repeatedly that they existed.
- Lectures:** Teachers are asked to check their lectures upon: 1) over-loaded slides, 2) duplicate information. Applies to weeks 2, 7 and 8. The content of the "genomics in medicine" should be re-evaluated and eventually re-designed to match it to the content of a genetics week.
- Calculation ex. Handouts:** Attendance list will be maintained. Useful, but more and more students will use their own laptop or tab to make notes. Teacher will investigate in advance how many printed hand-outs are needed.
- Demonstrations:** Were very welcomed. Instructions for the reports will be supplemented with more detailed information.
- Articles:** No complaints. Attendance list will be maintained.
- "Sum-up" hour:** No complaints.
- Exams:** Both calculation exam and main exam: fair and adequate. Students appreciate that the calculation exam is held early, i.e. during week 3.
- Work-load:** Was considered OK.
